

# TOWARDS AN ANCHORED DICHOTOMY

---

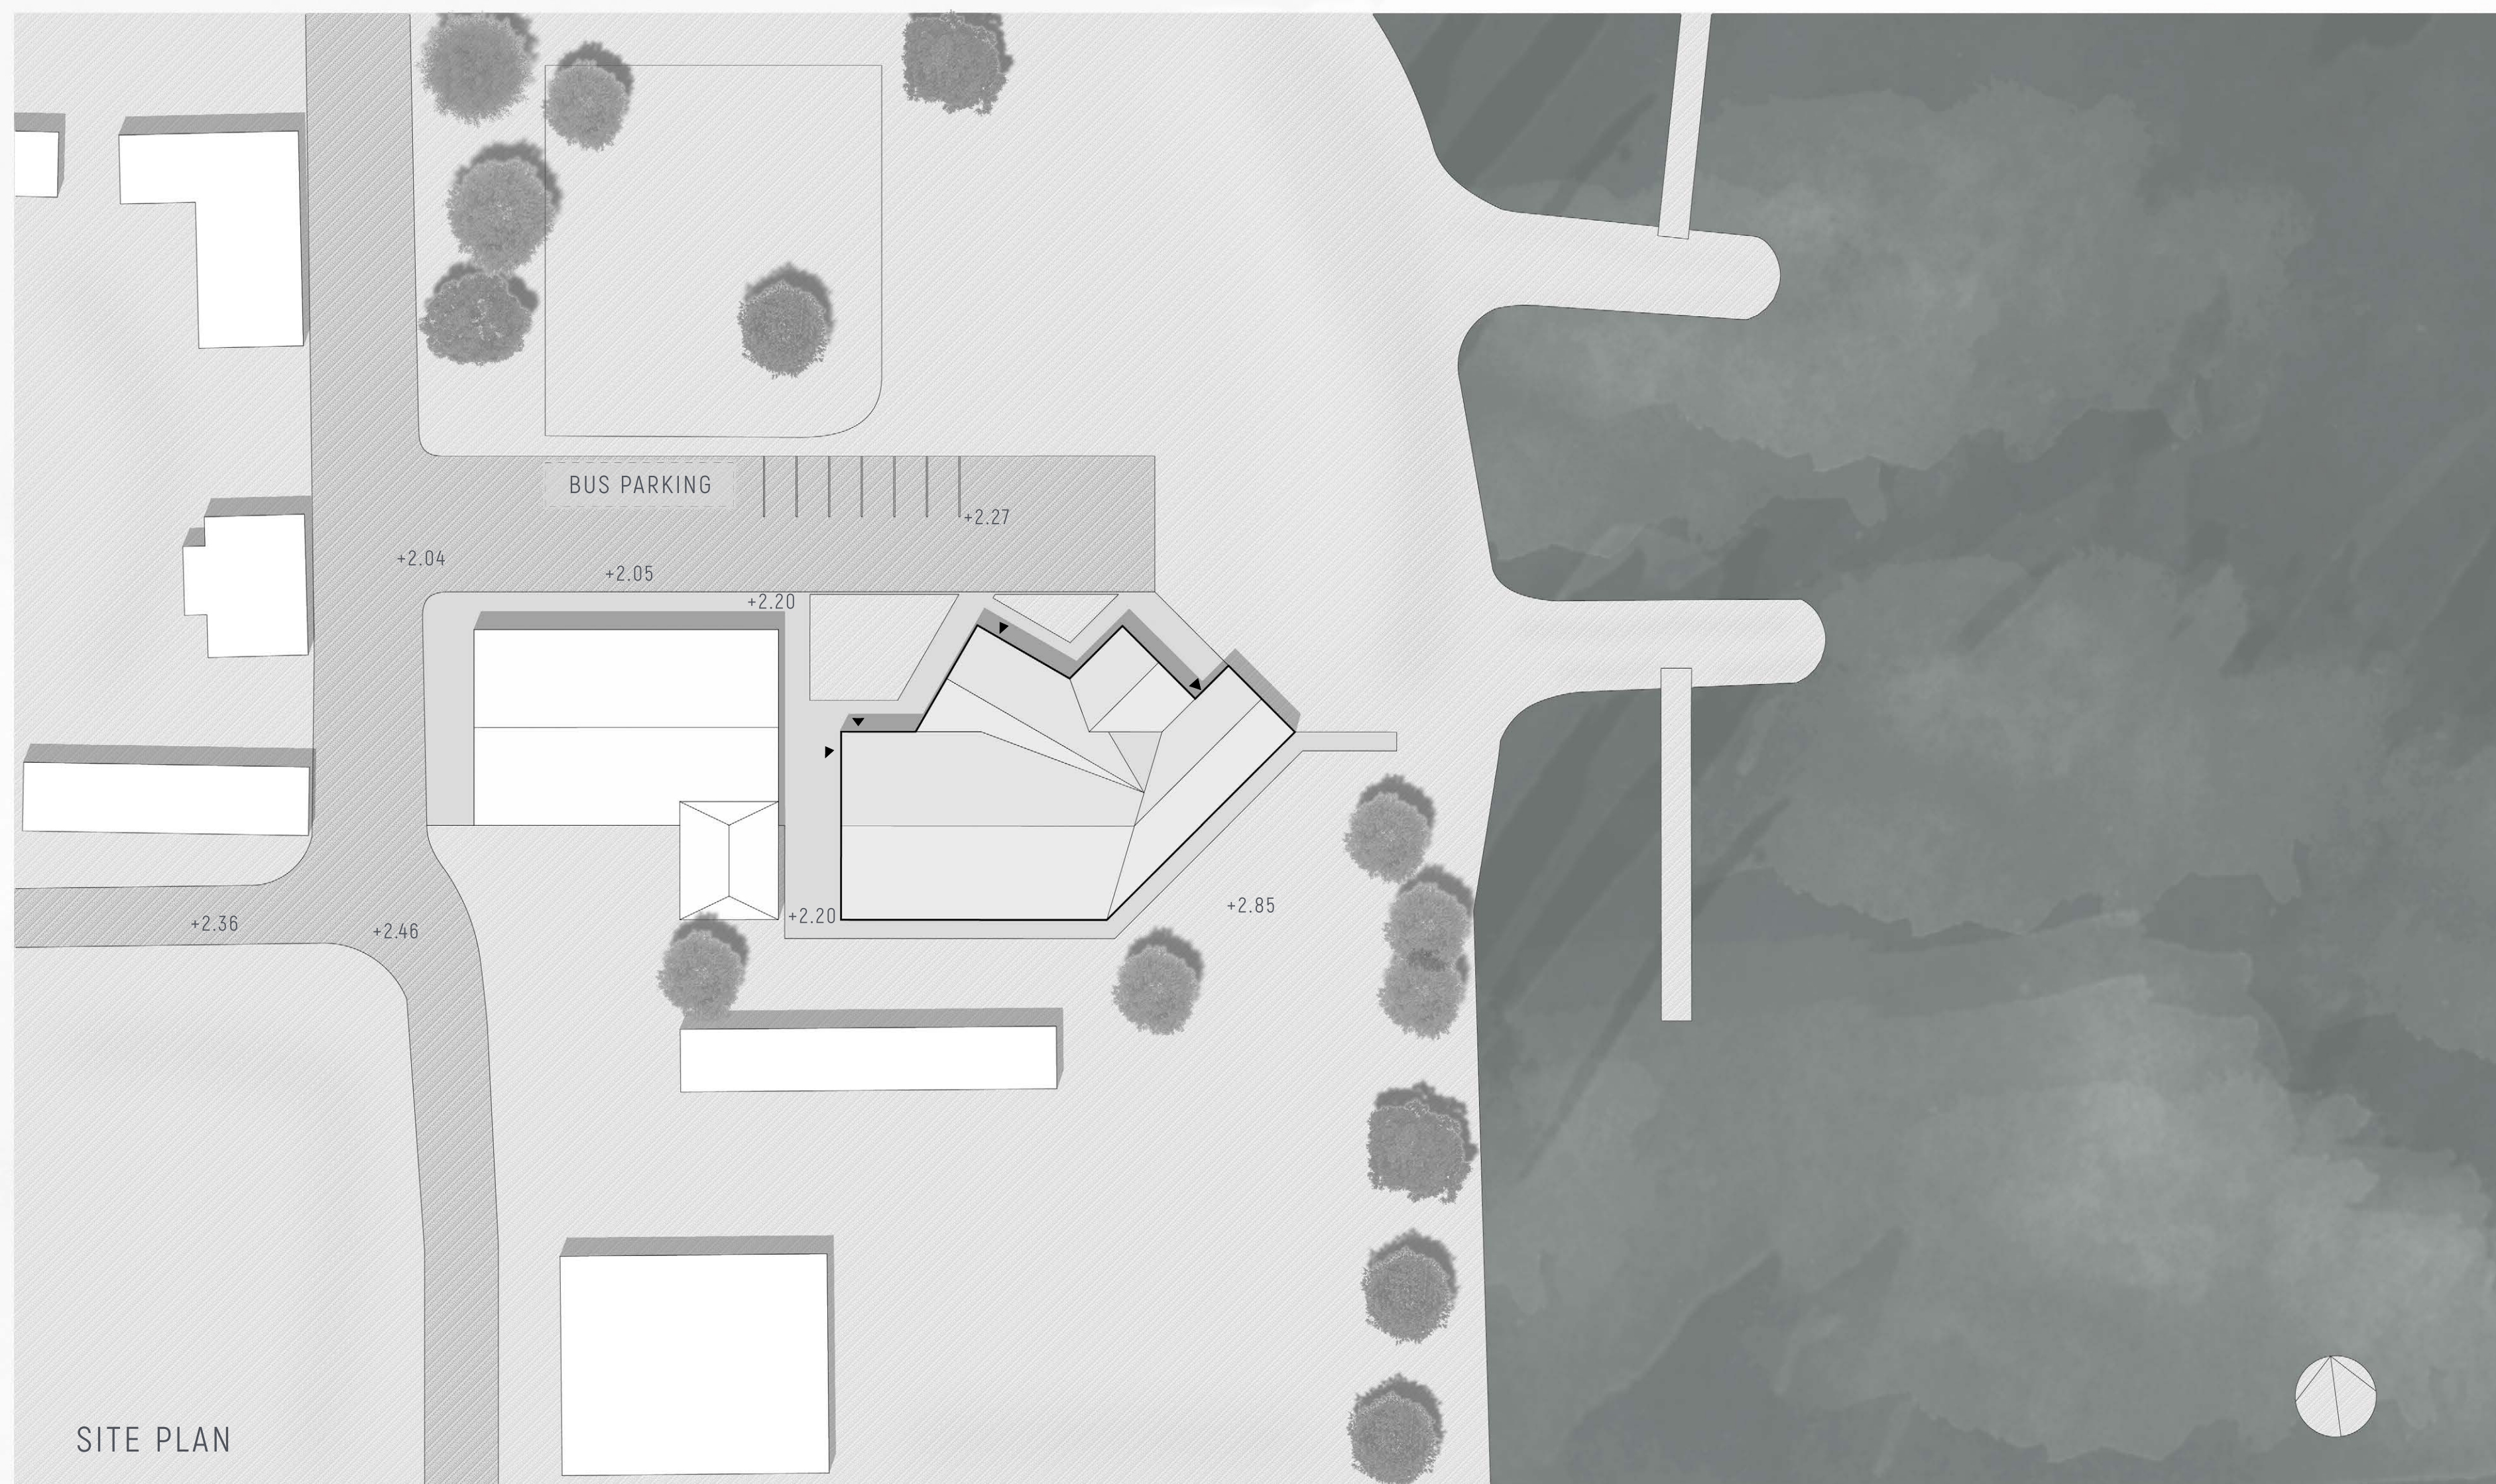

"Towards An Anchored Dichotomy" seeks unify the new with the old, the future with the past, the maritime with the inland. The proposed building is designed in a manner that both compliments and improves the surroundings. The use of pitched roofs in the design acts as the unifying element to the historical part of town. The roofs also create an interesting dynamic that can relate to the waves in the sea. From the road, visitors are first encountered with a large mass peaking over the existing building. As they turn the corner, they are met with large and inviting windows that visitors will gravitate towards.

Boats coming to the guest harbor will see two large, glass-enclosed forms that at night, may act just as a lighthouse, or a welcoming symbol for boats and ships entering Kristiinankaupunki.

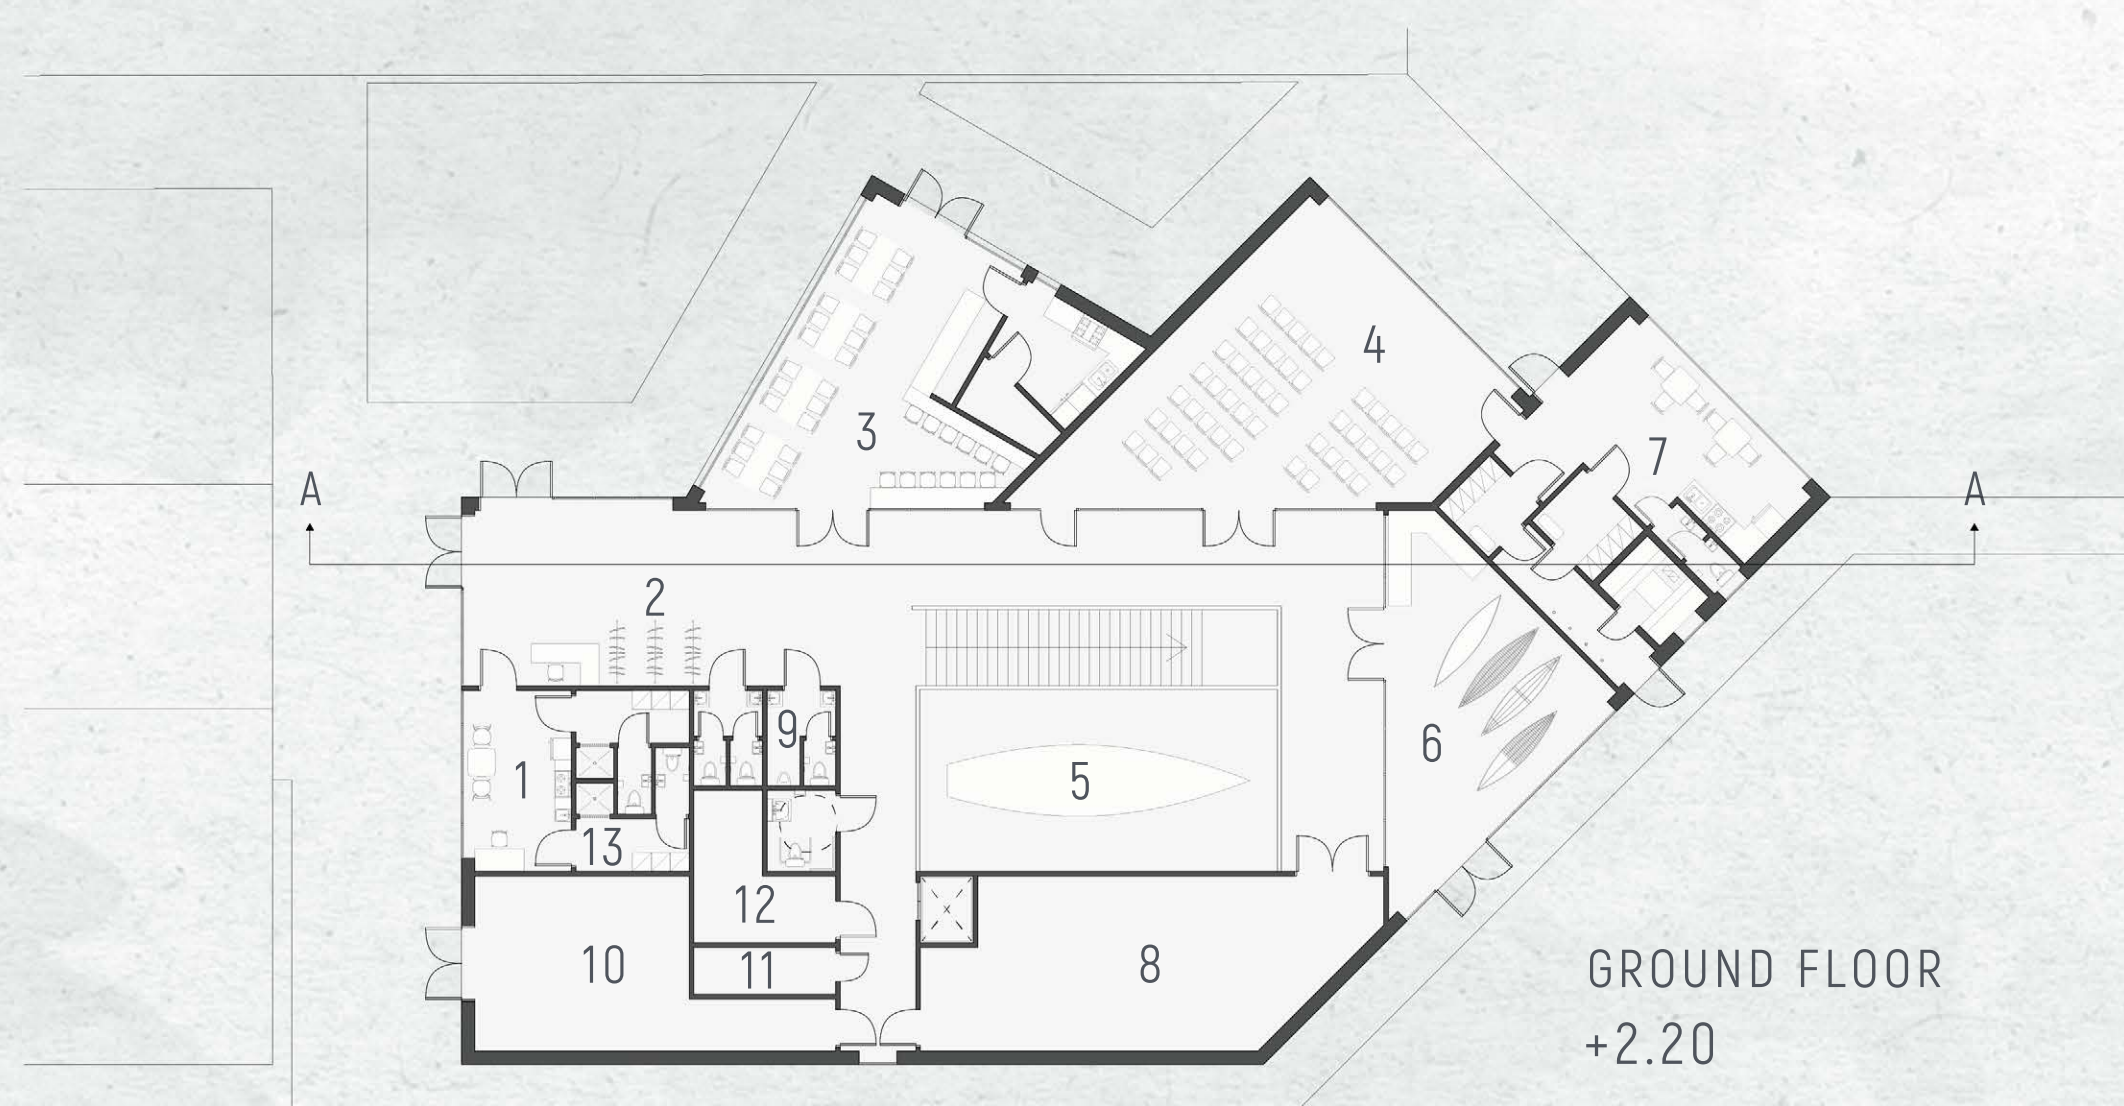

Inside one of these forms is the designated space for the guest harbor visitors, and the other- the meeting space that has an unobstructed view out onto the sea. The interior spaces are arranged to maximize sunlight and visibility for the most public and heavily trafficked areas. The workshop space, meeting room, and restaurant are kept visually connected to the rest of the building through glass walls on the interior that allow museum visitors to feel a sense of openness that also allows for museum staff to regulate or monitor museum activity. The exhibition space is located upstairs, where visitors must pass by the ALMA model to reach. The location of the model allows for maximum visibility of it, as well as allowing for the model to not be placed in direct sunlight.

1.	Office/ Staff Room	13 m <sup>2</sup>
2.	Cloakroom	10 m <sup>2</sup>
3.	Restaurant & Kitchen	57 m <sup>2</sup>
4.	Events Hall	63 m <sup>2</sup>
5.	ALMA Model	45 m <sup>2</sup>
